Summary

MERN Stack Developer with 1.5+ years building production web and mobile applications end-to-end on the JavaScript stack — MongoDB, Express, React, Node.js, and React Native. Owns the complete development lifecycle from concept to deployment, including a 5-module logistics platform that digitized dispatch operations for a multi-branch business.

Technical Skills

Languages: JavaScript (ES6+), HTML5, CSS3	Frontend: React.js, React Native, Tailwind CSS, Bootstrap, Figma
Backend: Node.js, Express.js, MongoDB	Mobile: Expo, EAS Build
Tools: Git, GitHub, Vercel, Render, Netlify, Nodemailer	CMS: WordPress

Experience

MERN Stack Developer | Sanghi Brothers, Jodhpur

Dec 2024 – Present

System & Automation Technician role · MERN Stack Development track

- Designed & built **BranchFlow Pro**, a 5-module logistics platform (Staff Web, Admin Panel, Mobile App, API) covering real-time dispatch tracking, role-based access control & Android APK via EAS Build — now used for day-to-day branch operations
- Built **Feedback & Complaint System**: a 4-part architecture (QR intake, Socket.io live admin dashboard, backend, database) replacing manual complaint tracking, deployed on Render; also developed company website end-to-end (MERN, Tailwind) — sanghibros.vercel.app
- Built **Electricity Billing App** (React Native, JWT auth): automated PDF bill generation and OTP-based recovery, with a configurable billing engine handling multiplier & fixed-charge logic for tenant accounts

Freelance MERN Stack Developer | Self-employed

Jul 2024 – Nov 2024

MERN Stack & UI Development

- Built **Urban Estate** (MERN + Firebase) — Live and **Hotstar Clone** (React, TMDB API) — Live
